Domino Hosting

Virtual

Our virtual Domino services allow you to take advantage of our powerful servers while keeping your costs down.

All shared customers receive the following:

- One IP address allocated
- Separate data subdirectory
- Unlimited replication over port 1352
- 100MB of disk space for your databases
- 1GB of TCP/IP transfers over port 80
- 24x7 monitoring of your web site
- No charge Domain Name Services
- Access to private Address database
- User Agents

Partitioned

Our partitioned Domino services allow you to have full control over the Domino server without the expense of a dedicated server.

All partitioned customers receive the following:

- Two IP addresses allocated
- Private Domino data directory
- Unlimited replication over port 1352
- 9 GB of disk space for your databases
- 4GB of TCP/IP transfers over port 80
- 24x7 monitoring of your web site
- No charge Domain Name Services
- Full access to names.nsf
- All agent rights
- Limit of 4 partitions per server

Dedicated

Our dedicated Domino servers allow you to take full advantage of our powerful servers, you are the sole client using the machine. coreFusion supplies the Domino server license, our staff can even help install additional software.

All dedicated customers receive the following:

- Two IP addresses allocated
- Private Domino server
- Unlimited replication over port 1352
- 36 GB of disk space for your databases
- Unlimited transfers over port 80
- 24x7 monitoring of your web site
- No charge Domain Name Services
- Administrator access to names.nsf
- All agent rights

Colocated

Colocated servers are as simple as they sound. It's your hardware, you can run anything that you like. You are responsible for licensing and installation, coreFusion will maintain the server and provide:

- One IP address
- Unlimited replication over port 1352
- Many bandwidth options
- 24x7 monitoring of your web site
- No charge Domain Name Services
